General Software	MS/Libre Office, Photoshop, Reaper, Houdini, Blender
Other	Electricity/electronics, microcontrollers, soldering

Soft skills

- Pro active
- Problem solving
- Great communication
- Taking initiative
- Quick Learner
- Team Player

Experience

VR Unity software developer Rhinox

Sep 2023 - current

I create VR training programs for businesses, virtualizing their internal training processes. These programs focus on replicating real life work environments and techniques.

- VR/AR Development
- C# .NET and also in context of Unity
- Internal tooling
- Python (Flask/Django)
- Shaders, optimized for mobile GPU

Seasonal work Callens, Calculation tool Maintenance

Holiday periods

I revamped and maintained an in-house energy calculation tool for thermodynamic properties of water, steam and thermal oil. Used for training, calculations and sales.

- Refactor and maintain legacy VB.Net
- Front/back end of the application
- Optimize and consolidate VBA scripts
- Self reliance
